

SICIS BAR

BANCO BAR / BAR COUNTER

SICIS®

SICIS presents a new concept for the entertainment space, developed using the Factory products, which are malleable and adaptable in almost infinite two-dimensional and three-dimensional combinations. Quoting the architect Marco Lucchi, the creator of the project together with the Maison's designers, the aim is to create a "WOW" effect in the user, and a job has failed if it doesn't satisfy this dogma. Following this principle, by combining mosaic, Vetrite, steel and fabrics we realized an ambience that places transversally on the market, and adapts to any area with these necessities: bars, restaurants, hotels.

The counter can be tailored depending on its use: from the shelves to the cocktail station, coffee or champagne station, refrigerators, sinks, ice machines and so on.

It is proposed with a height of 95 cm, lower than classic counters, to create a particularly pleasant atmosphere. To emphasise this aspect and create a greater closeness between the bartender and the customer, it can be associated with accessories such as the countertop coffee machine.

The counter structure is in plywood with a steel cladding, while the front can be covered in mosaic, following exclusive patterns, with tesserae in different shapes and materials, from glass paste to steel tesserae.

The handrail placed along all the structure is made of steel and has a LED system in the inner side, to illuminate the counter's decor, the dominant element of the space.

Even the shelves, placed in the wall behind the counter, are equipped with a central LED, set as to enlighten the bottles vertically, so they take on an unexpected scenographic value.

Architect Marco Lucchi proposes a lounge realised with panels in backlit Gem Glass Vetrite, both on the walls and ceiling, that give a seducing and special aura to the whole.

SICIS presenta un concetto inedito per lo spazio d'intrattenimento, elaborato attraverso l'utilizzo dell'universo di prodotti della Factory, plasmabili e adattabili in infinite combinazioni bidimensionali e tridimensionali. Parafrasando l'architetto Marco Lucchi, ideatore insieme ai designer della Maison del progetto, lo scopo è quello di generare nell'utente l'effetto "WOW", e un lavoro non è riuscito se non soddisfa questo dogma. In base a questo principio con una contrapposizione di mosaico, Vetrite, acciaio e tessuti, si è sviluppato un ambiente che si vuole porre in maniera trasversale sul mercato, adattabile a qualsiasi area con queste esigenze: bar, ristorante, albergo.

Il banco bar è realizzabile su misura in ogni sua parte, in base alle necessità di utilizzo; dalle mensole, postazione cocktail, postazione caffè o champagneria, celle frigo, lavandini, macchine del ghiaccio, ecc...

Sicis propone il banco ad un'altezza di 95 cm, per determinare maggiore vicinanza tra barista e cliente e permettere così di ottenere un'atmosfera particolarmente conviviale.

La struttura del banco è in multistrato rivestito in acciaio, mentre il fronte può essere rivestito in mosaico, secondo pattern esclusivi, con tessere in diverse forme e materiale, dalla pasta vetrosa alle tessere in acciaio.

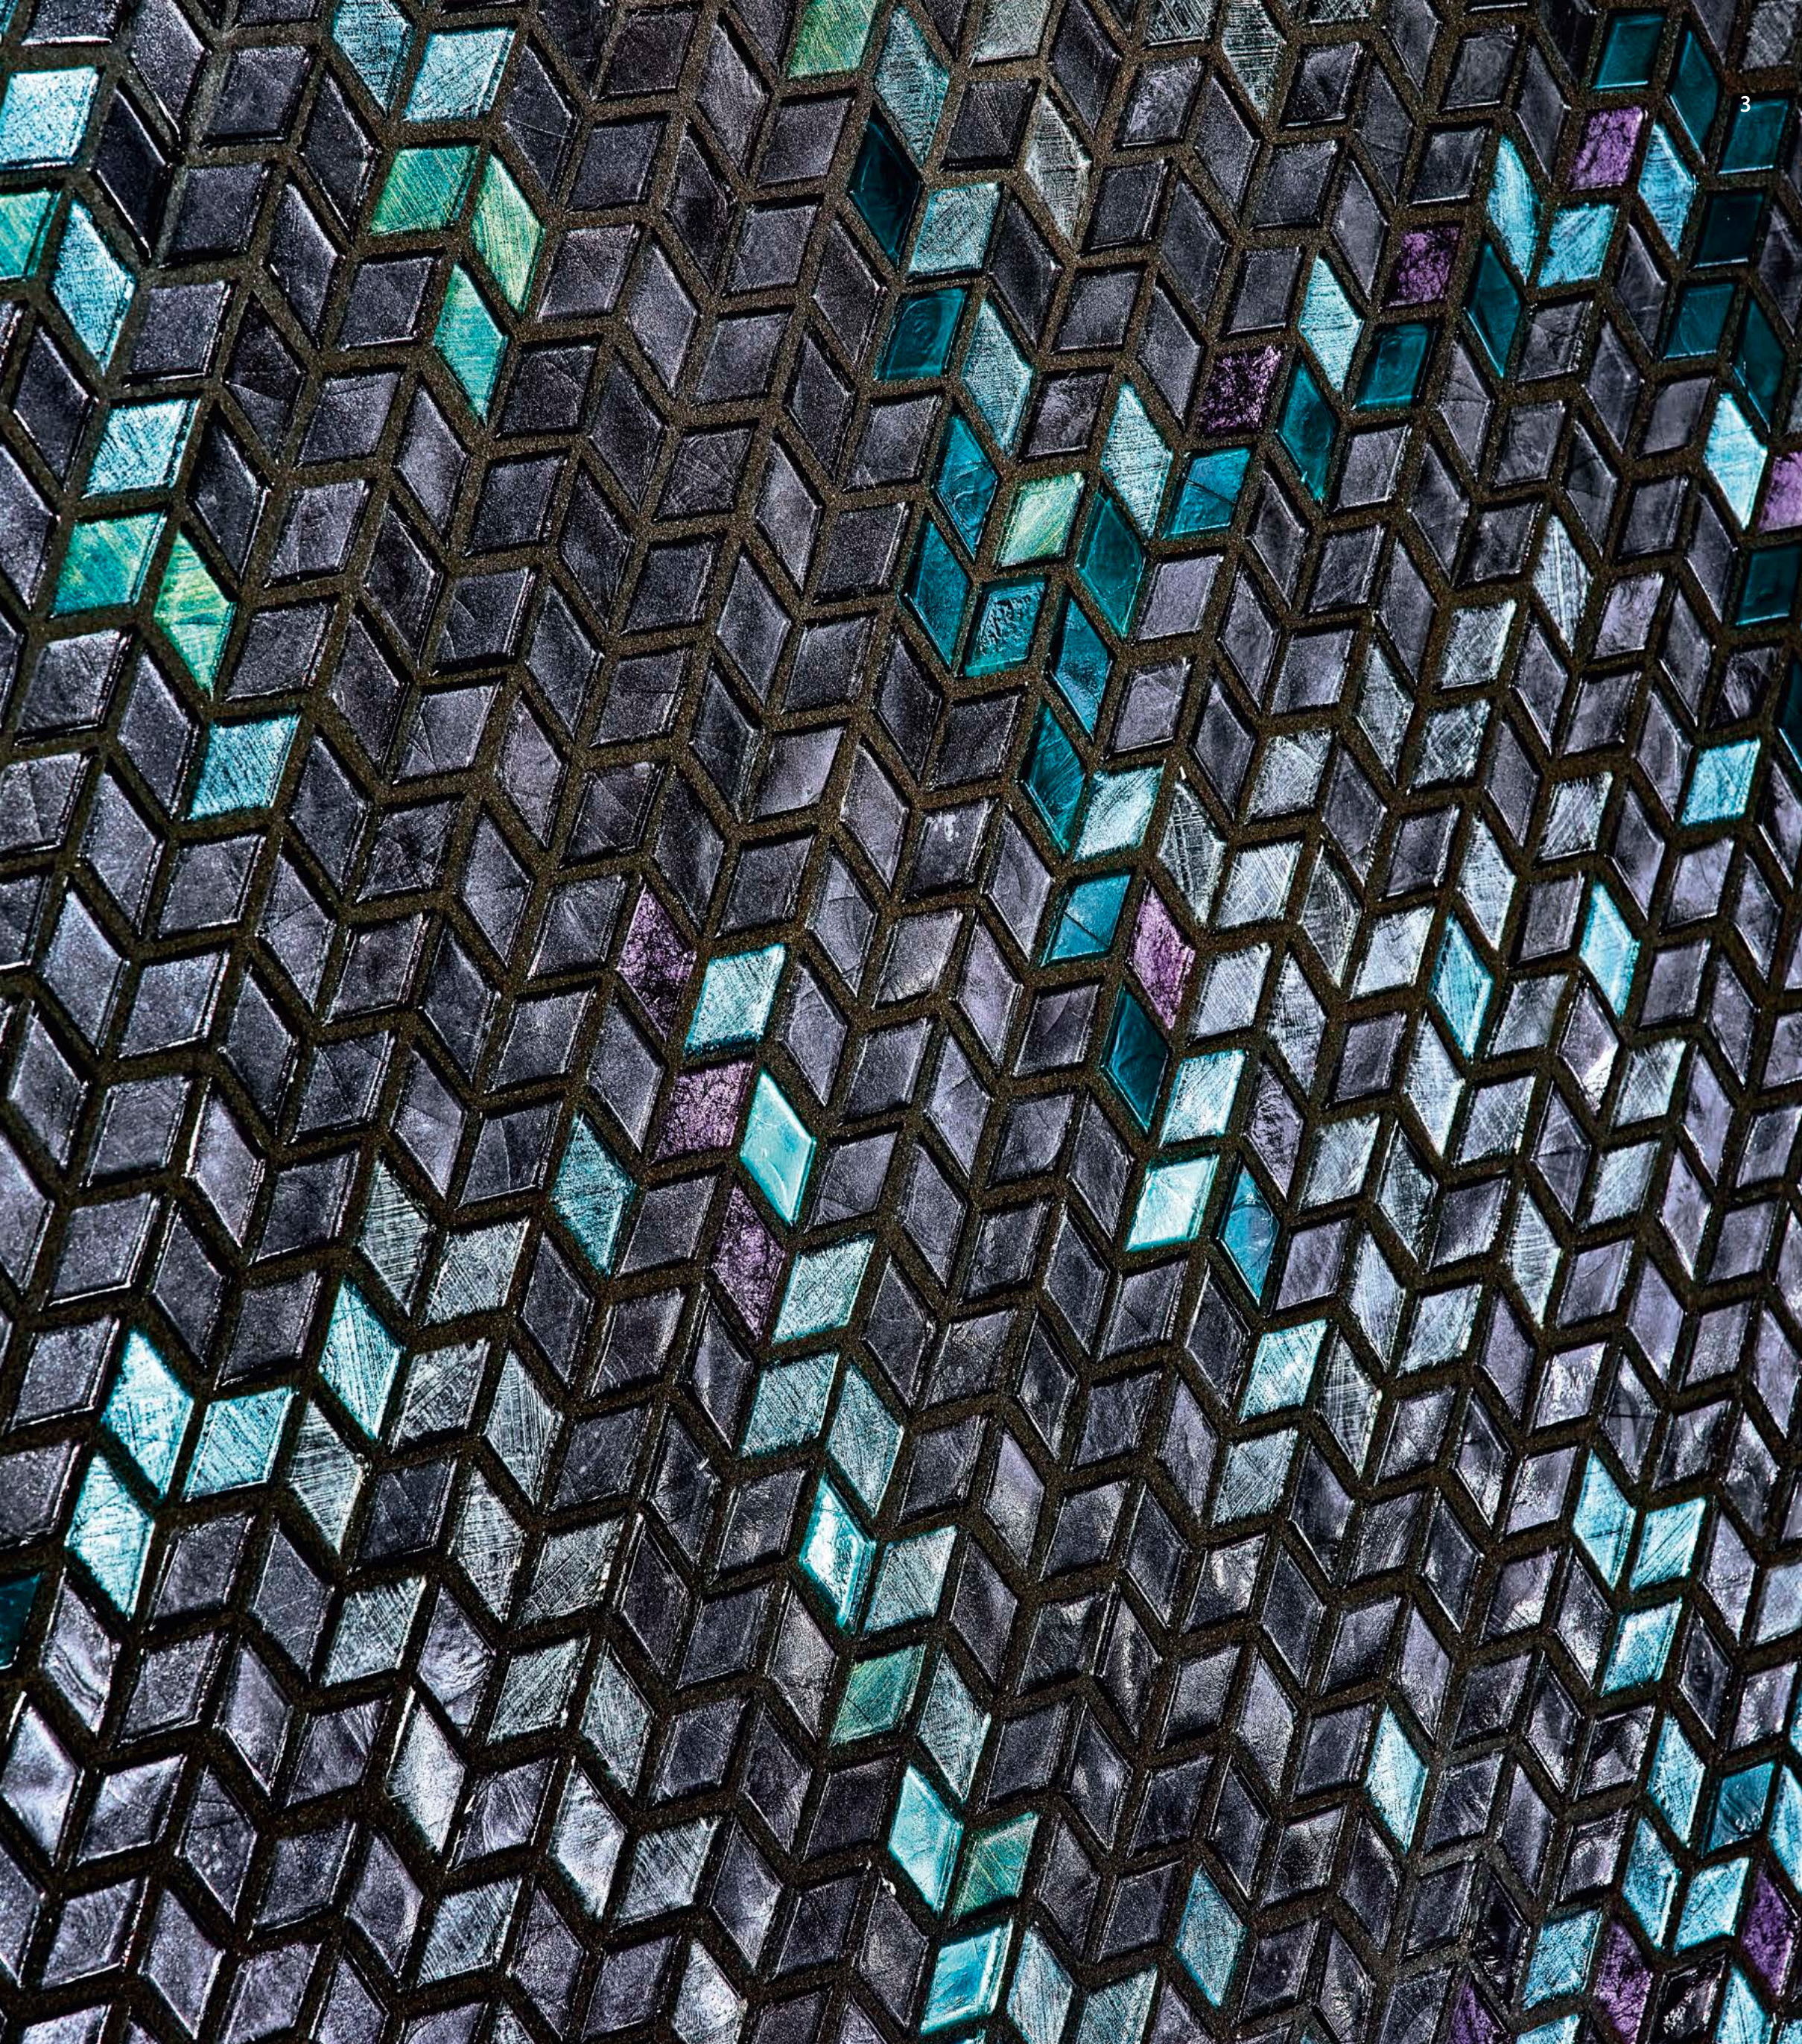

Il corrimano, posto lungo tutta la struttura è in acciaio e nella parte interna presenta un sistema di illuminazione a LED, che consente di illuminare il decoro del banco, elemento forte dello spazio.

Anche le mensole, poste nella parete dietro il bancone, sono fornite di un LED centrale disposto in modo da illuminare verticalmente le bottiglie che assumono un valore scenografico inaspettato.

L'architetto Marco Lucchi propone una lounge realizzata con pannelli in Vetrite Gem Glass retroilluminati sia a parete che a soffitto, che donano un'aria seducente e speciale all'insieme.

MATERIALI
MATERIALS

GEM GLASS

SICIS

Lastre di vetro dalle tonalità pure, dilaganti, increspature e giochi di colore su basi omogenee, bianche, fino a cromature e suggestioni lunari. Talvolta opalescenti capaci di trasferire la luce all'esterno, mantenendo inalterato l'armonia delle texture.

Timeless gems that reflect their rare beauty through the magic of glass. Glass slabs with rich and saturated colors and shading, rippling patterns create various color effects on fields of opaque, white, or chrome invoking lunar-like landscapes. Also available in translucent finish allowing light to play with the colors and patterns.

INSTALLAZIONE / INSTALLATION

Peso teorico al m. indicativo. Peso effettivo comunicato in fase di progettazione.
ALIMENTATORE DISPONIBILE CON INPUT DA 100 / 250 Vac CON FREQUENZA DA 47 / 63 Hz

Approximate theoretical weight per m. The actual weight will be communicated at the design stage.
DIMMABLE AVAILABLE WITH INPUT FROM 100 / 250 Vac WITH FREQUENCY FROM 47 / 63 Hz

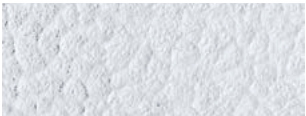

INFORMAZIONI USCITA CAVI / INFORMATION ON POWER CABLE EXIT POINTS

L'uscita cavo di alimentazione, se non diversamente specificato, è posizionata sul lato posteriore del pannello in prossimità del centro dei profili sul lato lungo. La lunghezza del cavo di alimentazione è determinata dalle dimensioni del pannello, dalla tipologia d'installazione o da specifiche richieste dal cliente.

The exit cable's hole standard position, unless otherwise specified, is located on the Panel's back side close proximity to the profile center, on the long side. The power cable's section may change according to the panel's dimension, mounting system and consumer request.
