

bath_025

antoniolupi

bath_025

Un linguaggio architettonico contemporaneo, fatto di pieni e vuoti, di piani che si intersecano, superfici planari e volumi netti che si integrano a linee morbide e forme avvolgenti, elementi che si sovrappongono, dialogano con lo spazio per un progetto che completa la proposta di antoniolupi ed esprime attraverso la coerenza dei materiali e delle forme e i dettagli ricercati un lusso discreto e non ostentato.

Una proposta articolata sia per la zona giorno, sia per la zona notte, nella quale nulla è lasciato al caso, una collezione destinata a crescere nel tempo con nuovi elementi e complementi che associano funzionalità ed estetica per definire un paesaggio domestico che sia piena espressione dello stile antoniolupi.

A contemporary architectural language, made up of solids and voids, intersecting planes, flat surfaces and sharp volumes that integrate with soft lines and enveloping shapes. Elements that overlap and dialogue with the space for a project that completes antoniolupi's proposal and expresses through the consistency of materials, shapes and refined details, a discreet and unostentatious luxury.

An articulated proposal for both the living area and the sleeping area, in which nothing is left to chance, a collection destined to grow over time with new elements and complements that combine functionality and aesthetics to define a domestic landscape that is the full expression of the antoniolupi style.

SESAMO

2012

design_Arkimera

Modello e design registrato, brevetto depositato
Registered model and design, patent filed

Sesamo è una collezione innovativa che supera il concetto di accessori per il bagno in modo radicale, li mantiene invisibili per poi renderli disponibili al momento dell'utilizzo. Le nicchie sono realizzate in acciaio inox e possono essere rivestite con lo stesso materiale della parete. Nessun limite per il tipo di finitura, massima igiene e funzionalità.

Sesamo is an innovative collection that dramatically goes beyond the concept of bathroom accessories, making them invisible yet available only when necessary. The niches are made of stainless steel and can be coated with the same wall material. No limits to the type of finish, maximum hygiene and functionality.
