SICIS®

## VETRITE® Lastre | Slabs

Vetrite nasce attraverso un'intensa attività di ricerca volta alla realizzazione di nuove evoluzioni dei materiali decorativi di lusso da rivestimento, ed è per SICIS un passaggio naturale, dalla tessera di mosaico fino alla grande lastra. Il vetro, materia intrinseca al DNA dell'azienda, con l'applicazione composita di polimeri che ne diventano il cuore, è il protagonista di queste lastre di grandi dimensioni.

**Il formato può arrivare a 135x400 cm** con uno **spessore da 4mm fino a 20mm**, in caso di particolari utilizzi. Nella Factory di SICIS e negli Atelier si mescolano saggiamente tecniche e alchimie, abilità manuali e arte ed è in questo ambiente che trova forza una precisa intuizione: creare un prodotto all'avanguardia dal punto di vista innovativo ed estetico, che supera la barriera delle dimensioni. La Vetrite è per SICIS la capacità di pensare il rivestimento senza vincoli di alcun tipo, uno stile, un'arte decorativa, evocativa, preziosa, capace di donare emozioni, svelare trame esclusive, pattern unici, colori suadenti.

*Vetrite was born thanks to intense research aimed at creating new evolutions for luxury decorative wall covering materials, and for SICIS it is a natural step from the mosaic tile to the large slab. Glass, an intrinsic material in the DNA of SICIS, is now once again revolutionized whereby SICIS iconic fabrics are sandwiched with polymer film (rendering it resistant) between large format glass slabs.*

**The format can reach 135x400 cm** with a **thickness from 4mm up to 20mm**, in case of particular uses. We mix techniques and alchemy, manual skills and art in order to create an avant-garde product from an innovative and aesthetic point of view, that overcomes the barrier of dimensions. Vetrite gives us a style, a decorative, evocative, precious art, capable of giving emotions, revealing exclusive textures, unique patterns, persuasive colors.

## CARATTERISTICHE

Lastre di vetro di **GRANDE FORMATO** **SPESSORE VARIABILE**.

Combinazione di polimeri metallici con vetro.

**Vetro di sicurezza** progettato per essere facilmente lavorato e trasformato con semplici macchine e direttamente nel sito di costruzione.

**Materiale decorativo**, artisticamente sorprendente, con una versatilità che gli permette di ricoprire molteplici superfici, sia in ambito residenziale che non.

### VANTAGGI TECNICI: LE LASTRE CURVE

Vetrite può essere richiesta curva e bifacciale.

## SETTORI DI APPLICAZIONE

- RIVESTIMENTI MURALI
- PAVIMENTI
- AREE UMIDE (SPA, SAUNE)
- PISCINE
- MOBILI
- PORTE INTERNE
- CUCINE
- LAVABI
- VASCHE
- SCALE
- NAVALE
- HOME AUTOMATION

**Duttilità e flessibilità** sono parte del DNA di SICIS, e per questo le soluzioni innovative del gruppo trovano applicazione in svariati settori, dando risposta alle specificità dei singoli mercati e ai bisogni dei nostri partner, nel rispetto rigoroso degli elevati standard di eccellenza che ci caratterizzano.

## INSTALLAZIONE

### Installazione con adesivo

(suggerita per posa su muri di cemento, pavimenti ecc)

### Installazione con silicone

(suggerita per rivestire strutture tridimensionali: elementi di arredo, tavoli, componenti cucina ecc)

## ANTIMICROBICO/ ANTIBATTERICO

Il vetro, per sua proprietà, è un materiale **facilmente pulibile** e quindi **altamente igienico**. Le lastre in vetro Vetrite, **su richiesta**, contengono infatti anatase, una delle fasi tetragonali del biossido di titanio TiO<sub>2</sub>.

Questa sostanza, in presenza dei raggi UV, è nota produrre attività fotocatalitica.

## SICUREZZA

### SICUREZZA PER I CONSUMATORI

Vetrite è intrinsecamente un vetro di sicurezza e certificata secondo i principali standard internazionali e americani per le prove di impatto e antisfondamento. Vetrite può essere temprata per offrire maggiore resistenza.

### SICUREZZA PER TRASFORMATORI E INSTALLATORI

La direttiva europea 2398/2017 inserisce la silice cristallina, presente in tracce in tutte le pietre naturali e minerali, come sostanza cancerogena. In qualità di vetro, Vetrite contiene silice solo in fase amorfa e non cristallina. L'assenza della silice cristallina è stata certificata dal Centro Ceramico.

## TRASFORMAZIONE DELLE LASTRE

Vetrite è progettata per essere semplice da lavorare e trasformare, utilizzando macchine WATERJET e CNC, anche direttamente sul sito di installazione, per adattare Vetrite a qualsiasi richiesta e progetto.

## FEATURES

Large formats glass slabs with **VARIABLE THICKNESS**.

Vetrite is created by combining metal polymers with glass.

It's a **safety glass** designed to be easily worked and transformed, both with machines and directly on the construction site.

The result is a **decorative, artistically stunning material** with a versatility to clad multiple surfaces around your home or business.

### TECHNICAL ADVANTAGES: CURVED SLABS

Vetrite can be requested curved and double-sided.

## APPLICATIONS

- WALL COVERINGS
- FLOORS
- WET AREAS (SPAS, STEAM ROOMS)
- POOLS
- FURNITURE
- INTERNAL DOORS
- KITCHENS
- VANITY UNITS
- BATHTUB WORKTOPS
- STAIRCASES
- NAVAL
- HOME AUTOMATION

**Ductility and flexibility** are part of SICIS's DNA, and for this reason our innovative solutions can be used in various areas, responding to the specificities of individual markets and the needs of our partners, in strict compliance with the high standards of excellence that characterize us.

## INSTALLATION OF SLABS

### Installation using adhesive

(suggested for laying on cement walls, floors etc.)

### Installation using silicone

(suggested for covering three-dimensional structures with Vetrite: pieces of furniture, tables, kitchen components, etc.)

## ANTIMICROBIAL/ ANTIBACTERIAL

Due to its properties, glass is an **easily cleanable** and therefore **highly hygienic** material. Vetrite glass slabs, **on request**, contain anatase, one of the tetragonal phases of titanium dioxide TiO<sub>2</sub>. This substance, in presence of UV rays, is known to produce photocatalytic activity.

## SAFETY

### CONSUMER SAFETY

Vetrite is a safety glass and certified according to the main International and American standards for impact and shatterproof tests. Vetrite can be tempered to offer greater strength.

### SAFETY FOR TRANSFORMERS AND INSTALLERS

The European directive 2398/2017 inserts crystalline silica, present in trace amounts in all natural stones and minerals, as a carcinogen. As a glass, Vetrite contains silica only in the amorphous and non-crystalline phase. The absence of crystalline silica has been certified by the Ceramic Center.

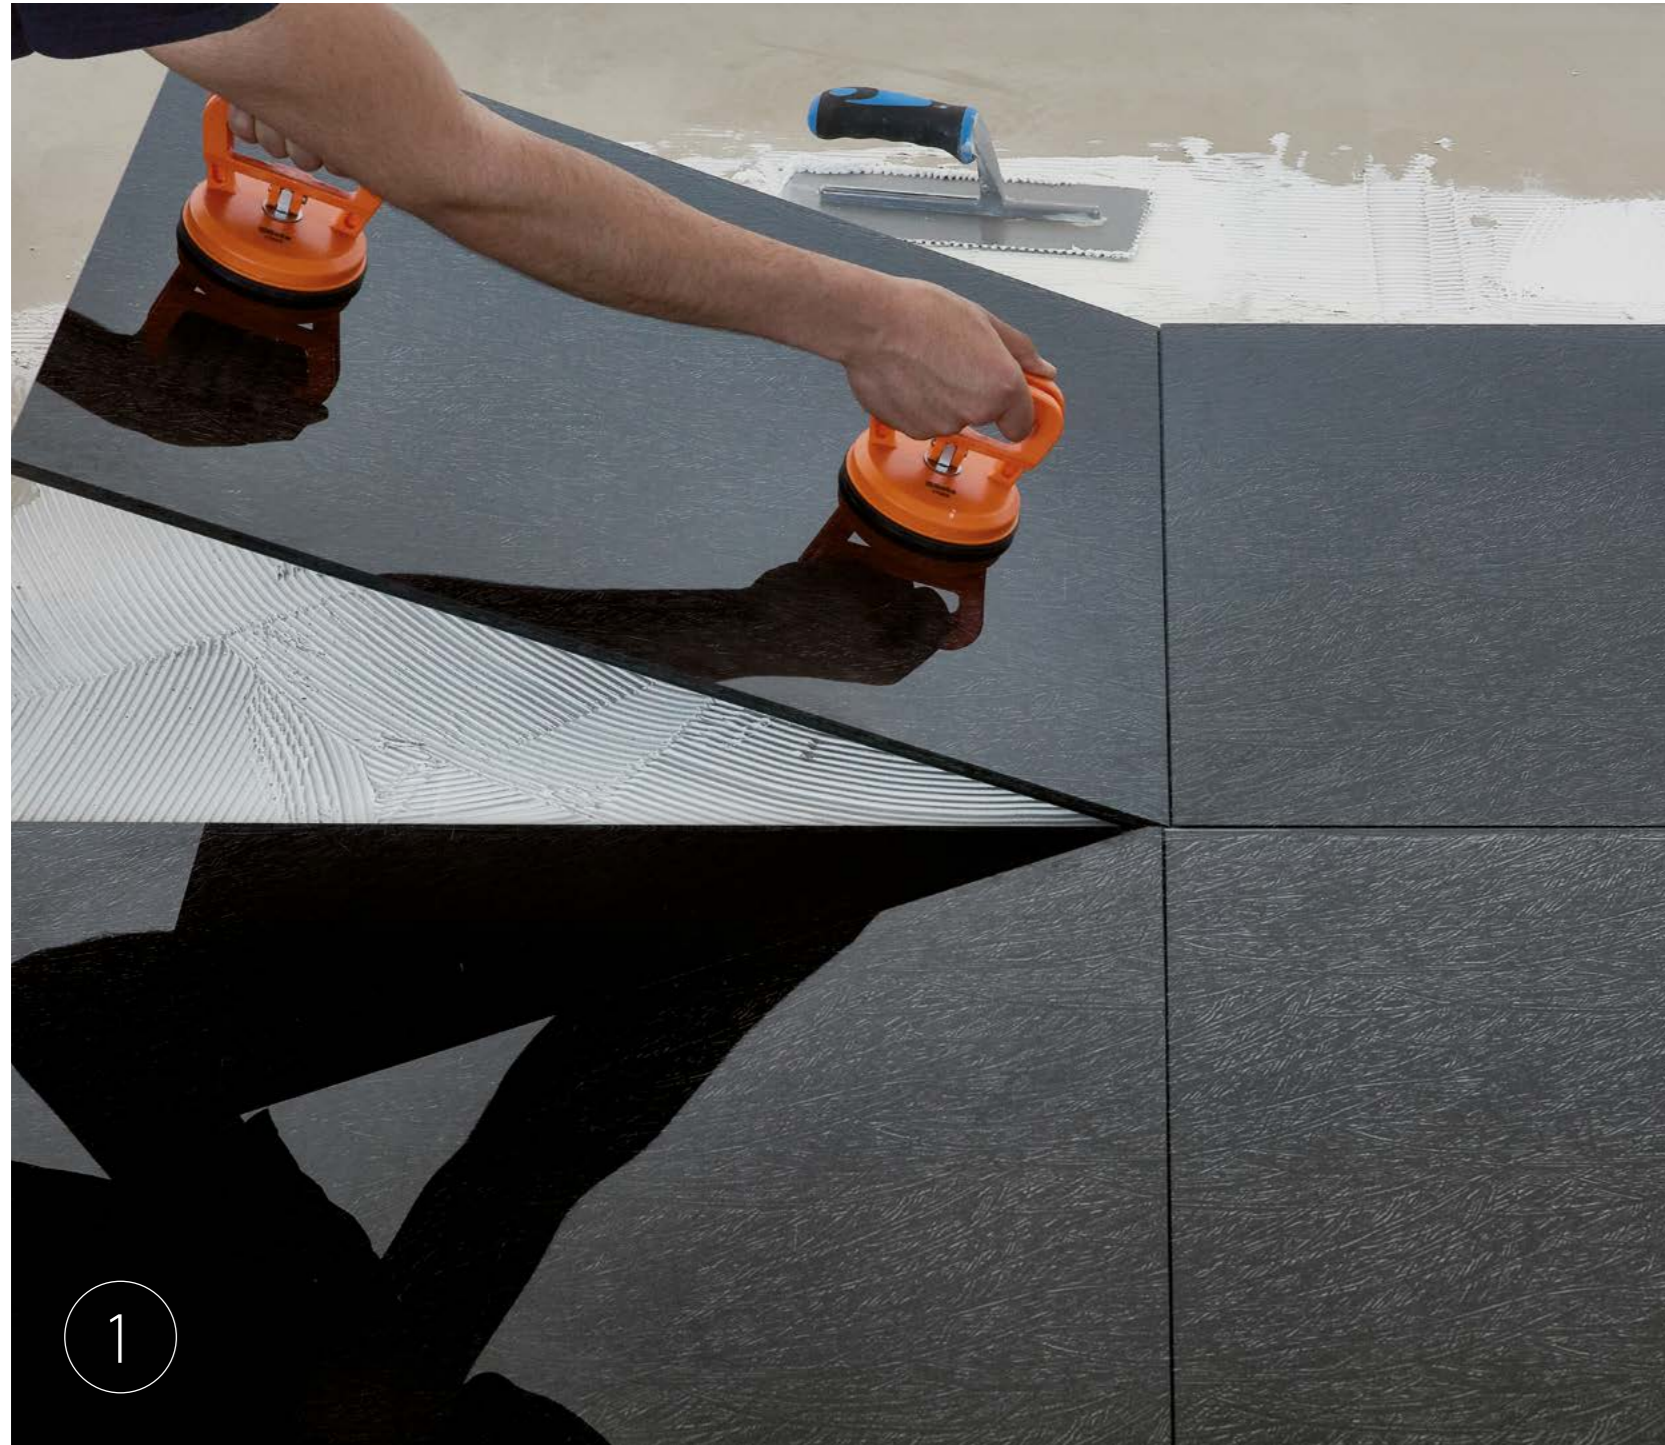

## TRASFORMING SLABS

Vetrite is designed to be easy to work and transform, using WATERJET and CNC machines, also easy to transform directly on site, therefore it can be adapted to any request and project.

Estrema facilità di installazione SU TUTTE LE SUPERFICI  
*Extreme easy of installation ON ALL SURFACES*

- ① **INSTALLAZIONE CON ADESIVO** suggerita per posa su pavimenti, muri in cemento etc.  
**INSTALLATION WITH ADHESIVE** suggested for laying on floors, concrete walls etc.

Riferirsi al Manuale di lavorazione, installazione e posa di Vetrite.  
*Refer to Vetrite Installation Manual.*

- ② **INSTALLAZIONE CON SILICONE**, suggerita per rivestire strutture tridimensionali, elementi di arredo, componenti cucina etc.  
**INSTALLATION WITH SILICONE**, suggested to cover three-dimensional structures, furnishing elements, kitchen components etc.

Riferirsi al Manuale di lavorazione, installazione e posa di Vetrite.  
*Refer to Vetrite Installation Manual.*

## Caratteristiche · *Physical properties*

Lastre di vetro di grande formato a spessore variabile.

*Large formats glass slabs with variable thickness.*

Vetrite è creata combinando polimeri metallici con vetro.

*Vetrite is created by combining metal polymers with glass.*

È un vetro di sicurezza progettato per essere facilmente lavorato e trasformato, il tutto con semplici macchine e direttamente nel sito di costruzione.

*It's a safety glass designed to be easily worked and transformed, both with machines and directly on the construction site.*

Il risultato è un materiale decorativo, artisticamente sorprendente, con una versatilità che gli permette di ricoprire molteplici superfici, sia in ambito residenziale che non.

*The result is a decorative, artistically stunning material with a versatility to clad multiple surfaces around your home or business.*

**Formati · Slab sizes**

1. **120x280cm e sottomultipli** · 47 1/4"x110 1/4" and submultiples
2. **135x290cm su richiesta** · 53 1/8"x114 1/8" on request
3. **135x400cm su richiesta** · 53 1/8"x157 1/2" on request

**Spessori · Thicknesses**

**Da 6 mm a 20 mm** · From 6 mm (0 1/4") to 20 mm (0 3/4")

**Finiture opzionali · Optional finishes**

**Satinata, SicisGrip** · Satin finish, SicisGrip finish

Spessore nominale 6 mm  
 Spessore reale 6.3 mm +/- 10%  
 (secondo UNI EN 14411:2004)

Possono esserci piccole variazioni di spessore da un colore all'altro o tra lotti diversi dello stesso colore.  
 Su richiesta per applicazioni speciali lo spessore nominale può variare da 4 a 20 mm.

Spessore nominale da pavimento 10 mm.  
 I colori: Alma, Aluminium, Antique, Antique Blu, Antique Green, Antique Ocra, Tela Brown, Tela Dark, Vis One, Vis Two, a pavimento necessitano dell'assistenza e consulto di SICIS.

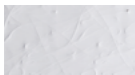

Nominal thickness 6 mm  
 Actual thickness 6.3 mm +/- 10%  
 (as per UNI EN 14411:2004)

There could be small variations of thickness among the colors or among dye lots of the same color.  
 For custom orders and for specific type of applications, nominal thickness can vary from 4 to 20 mm.

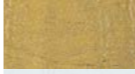

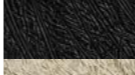

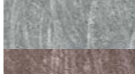

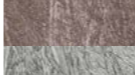

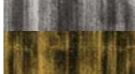

Nominal floor thickness 10 mm. Colors: Alma, Aluminium, Antique, Antique Blu, Antique Green, Antique Ocra, Tela Brown, Tela Dark, Vis One, Vis Two, for floor installations SICIS's assistance and advise is needed.

## Balcone filo muro interno o su facciata portante *Balcony flush with internal wall or load-bearing facade*

DESTINAZIONI D'USO: ogni balcone è studiato per essere fissato fronte muro o interno vano.  
VELOCITÀ DI MONTAGGIO: il montaggio è immediato, bisogna accertarsi però di fissarsi su un supporto portante.

Per ambienti poco affollati: residenziale categoria C2 -> 200 kg/m (testato a 300 kg/m)  
Per ambienti molto affollati: commerciale categoria C3 -> 300 kg/m (testato a 450 kg/m)

Entrambi i sistemi accolgono sia il vetro mm 8+8 che il mm 10+10 con le relative guarnizioni.  
L'altezza del parapetto può arrivare fino a 1,2 metri.  
Finiture: Personalizzazioni di serie e su richiesta.

*INTENDED USE: each Balcony has been designed to be fixed to the external wall surface or within the reveal.*  
*SPEED OF ASSEMBLY: assembly is immediate; however, the balcony must be fastened to a load-bearing support.*

*Low-traffic areas: Residential Class C2 -> 200 kg/m (tested at 300 kg/m)*  
*High-Traffic areas: Commercial Class C3 -> 300 kg/m (tested at 450 kg/m)*

*Both systems can accommodate both 8 + 8 mm and 10 + 10 mm glass with the proper gaskets.*  
*The balustrade height can reach up to 1.2 meters.*  
*Finish: Standard finish, customization upon request.*

① **BALCONE INTERNO:** fissaggio interno vano (ovvero all'interno del vano dell'infisso)  
*INTERNAL BALCONY: fixed to the reveal (i.e., within the window opening)*

② **BALCONE ESTERNO:** fissaggio fronte muro (ovvero esternamente dal vano della finestra direttamente sulla facciata)  
*OUTDOOR BALCONY: fixed to the external surface of the wall (i.e., externally either side of the window opening)*

# Electric Marble

I nuovi Electric Marble sembrano uscire dalle più ardite tonalità di sintesi.

Alla naturale gamma del Marmo si è voluto aggiungere un particolare effetto neon per creare qualcosa di unico, di introvabile, di rivoluzionario. Il Marmo prende vita all'interno delle venature come fosse colpito da bagliori metallici per creare lastre in vetro con tonalità metallizzate energiche che possano rendere unico ogni ambiente.

*SICIS is "electrifying" the market once again with an innovative treatment to a centuries old material, marble.*

*We present an ameliorated version of this noble material, created in our Vetrite versatile glass slabs. Infusing new life by injecting precious metals into the veins which reflect and glow the various shades of metallic hues.*

## Decorated Pattern

Gli spazi contemporanei si rivestono di elementi botanici surreali, che dai toni chiari raggiungono le sfumature dei blu intensi.  
Tra le tante manifestazioni di questa natura rara e sempre più fragile, ci interessano particolarmente i viaggi fantastici intorno a mondi infiniti.  
*The contemporary spaces are covered with surreal botanical elements, which from light tones reach the shades of intense blue.*  
*Among the many manifestations of this rare and increasingly fragile nature, we are particularly interested in the fantastic journeys around infinite worlds.*

## Specifiche tecniche *Technical data*

### Vantaggi tecnici: la Sicurezza · *Technical advantages: Safety*

#### SICUREZZA PER I CONSUMATORI:

Vetrite è intrinsecamente un vetro di sicurezza e certificata secondo i principali standard internazionali e americani per le prove di impatto e antisfondamento. Vetrite può essere temprata per offrire maggiore resistenza.

#### CONSUMER SAFETY:

*Vetrite is a safety glass and certified according to the main International and American standards for impact and shatterproof tests. Vetrite can be tempered to offer greater strengt*

#### SICUREZZA PER TRASFORMATORI E INSTALLATORI:

La direttiva europea 2398/2017 inserisce la silice cristallina, presente in tracce in tutte le pietre naturali e minerali, come sostanza cancerogena. Le lavorazioni in fabbrica e/o cantiere di questi materiali che producono polveri espongono i lavoratori al rischio di inalarla. In qualità di vetro, Vetrite contiene silice solo in fase amorfa e non cristallina. L'assenza della silice cristallina è stata certificata dal Centro Ceramico.

#### SAFETY FOR TRANSFORMERS AND INSTALLERS:

*The European directive 2398/2017 inserts crystalline silica, present in trace amounts in all natural stones and minerals, as a carcinogen. The processing in the factory and / or construction site of these materials that produce dust expose workers to the risk of inhaling it. As a glass, Vetrite contains silica only in the amorphous and non-crystalline phase. The absence of crystalline silica has been certified by the Ceramic Center.*

### Vantaggi tecnici: Antimicrobica e Antibatterica *Technical advantages: Antimicrobial and Antibacterial*

Il vetro, per sua proprietà, è un materiale facilmente pulibile e quindi altamente igienico. Le lastre in vetro Vetrite, su richiesta, contengono infatti anatasio, una delle fasi tetragonali del biossido di titanio TiO<sub>2</sub>. Questa sostanza, in presenza dei raggi UV, è nota produrre attività fotocatalitica.

*Due to its properties, glass is an easily cleanable and therefore highly hygienic material. Vetrite glass slabs, on request, contain anatase, one of the tetragonal phases of titanium dioxide TiO<sub>2</sub>. This substance, in presence of UV rays, is known to produce photocatalytic activity.*

L'attività fotocatalitica, oggetto di numerosi programmi di ricerca e sviluppo in tutto il mondo, permette l'ottenimento di alcune prestazioni speciali, tra cui l'autopulizia, la rimozione di alcuni inquinanti dall'aria ambientale e l'auto disinfezione da contaminanti batterici e muffe.

*The photocatalytic activity, subject of numerous researches and development programs all over the world, allows the achievement of some special properties, including self-cleaning, the removal of some pollutants from the air and self-disinfection of bacterial contaminants and moulds.*

### Trasformazione delle lastre · *Transforming slabs*

Vetrite è progettata per essere semplice da lavorare e trasformare, utilizzando macchine Waterjet e CNC, per adattare Vetrite a qualsiasi richiesta e progetto. È molto semplice trasformare Vetrite anche direttamente sul sito di installazione, facendo fori, intagli e fessure per adattarla a qualsiasi accessorio e impianto, dalle prese elettriche ai sanitari.

*Vetrite is designed to be easy to work and transform, using Waterjet and CNC machines, therefore it can be adapted to any request and project. It's also easy to transform Vetrite directly on site, making holes, notches and slots on it so to fit any accessory and fixture, from electricity plugs to sanitary ware.*

### Installazione delle lastre · *Installation of slabs*

Installazione con adesivo (suggerita per posa su muri di cemento, pavimenti ecc)  
Installazione con silicone (suggerita per rivestire strutture tridimensionali: elementi di arredo, tavoli, componenti cucina ecc)

*Installation using adhesive (suggested for laying on cement walls, floors etc.)  
Intallation using silicone (suggested for covering three-dimensional structures with Vetrite: pieces of furniture, tables, kitchen components, etc.)*

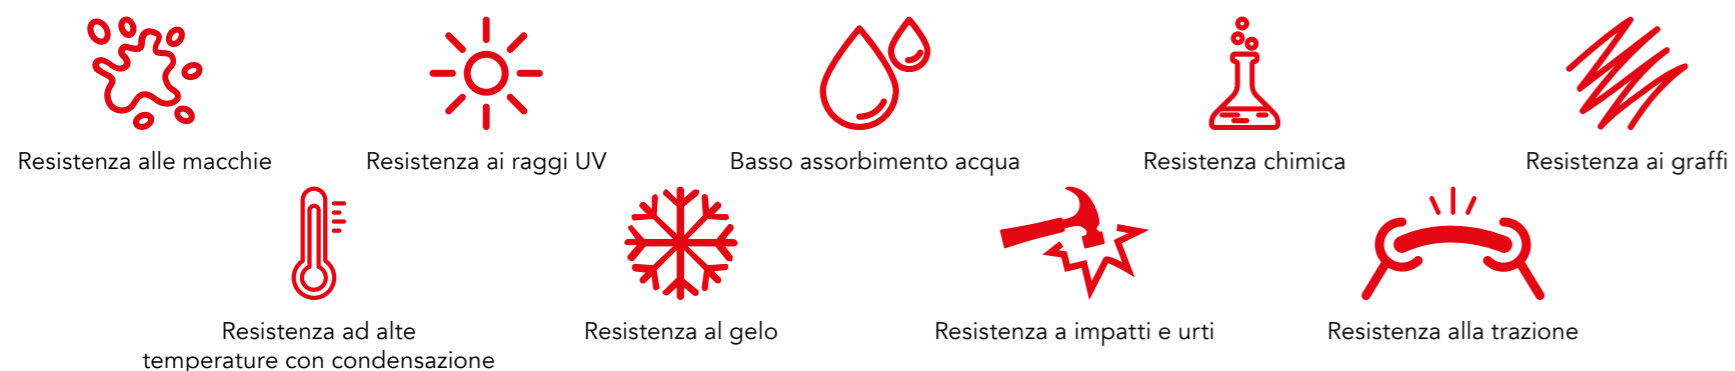

### Video lavorazione · *Video tutorials*

Abbiamo creato una serie di video tutorial dove imparare tutte le tecniche necessarie per utilizzare correttamente Vetrite. Una buona formazione in termini di conoscenza del prodotto e padronanza di lavorazione è necessaria per ottenere buoni risultati.

*We've created a series of video tutorials where to learn all the necessary techniques for the use of Vetrite. A good training in terms of product understanding and of the work methods is essential to obtain a good result.*

#### **PATTERN PRESENTI NELLE DECORAZIONI VETRITE:**

Non è garantita la continuità del disegno tra una lastra e quelle successive. Nel caso di disegni geometrici non è garantito il perfetto parallelismo tra le linee del disegno e i bordi della lastra in vetro.

#### **PATTERNS PRESENT IN VETRITE DECORATIONS:**

*The production process doesn't not guarantee the continuity of the design between a slab and the subsequent ones.*

*In case of geometric designs the perfect parallelism between the lines of the design and the edges of the glass slabs is not guardanteed.*

#### **LA COLLEZIONE VETRITE INCLUDE COLORI OPALESCENTI:**

Feather Champagne, Elephant Panna, Elephant Calima, Feather Cipria, Iguana Calima, Elephant Tortora, Iguana Tortora.

Tale caratteristica può creare con il colore dell'adesivo, o con una non omogenea spalmatura dello stesso, effetti estetici indesiderati conseguenti all'interferenza del colore vetrite/adesivo.

#### **VETRITE COLLECTION INCLUDES OPALESCENT GLASS:**

*Feather Champagne, Elephant Panna, Elephant Calima, Feather Cipria, Iguana Calima, Elephant Tortora, Iguana Tortora.*

*Are possible undesired esthetic effects due to interferences between glue color, or non homogeneous laying, and vetrite slabs. We suggest installation by white or neutral thinset.*

#### **DESCRIZIONE TECNICA DI VETRITE**

Prendere visione della versione completa ed aggiornata del Manuale di lavorazione, installazione e posa di Vetrite disponibile sul sito [www.sicisvetrite.com](http://www.sicisvetrite.com). Di seguito un estratto del documento originale il quale non può essere esaustivo di tutte le casistiche, è complementare e si aggiunge a quanto riportato al Manuale di posa Sicis disponibile sul sito [www.sicis.com](http://www.sicis.com). Per tutto quanto non espressamente previsto nel Manuale di lavorazione, installazione e posa di Vetrite riferirsi al Manuale di posa Sicis o consultare preventivamente il proprio responsabile commerciale o il servizio tecnico Sicis. Prendere visione dei video tutorial disponibile in rete riguardanti Vetrite sul sito [www.sicisvetrite.com](http://www.sicisvetrite.com). VETRITE è un vetro tecnico decorativo, ottenuto mediante la combinazione di polimeri in fase liquida, lamine metalliche e fibre tessili. Si tratta di un vetro composito versatile ad alta tecnologia, in grado di soddisfare i requisiti estetici, tecnici e ambientali più ambiziosi. Disponibile in spessori da 6 mm; su richiesta per applicazioni speciali può variare da 4 a 20 mm. Per l'utilizzo a pavimento si consiglia lo spessore da 10 mm con finitura Sicisgrip o Satin.

#### **TECHNICAL DESCRIPTION OF VETRITE**

*View the complete and updated version of the Vetrite technical and laying information available on the website [www.sicisvetrite.com](http://www.sicisvetrite.com). Below is only an extract from the original document which cannot be exhaustive of all the cases. The guidelines provided by this manual are complementary to those provided by the installation manual for SICIS's mosaic, available on SICIS's website [www.sicis.com](http://www.sicis.com). For all that is not explicitly encompassed in Vetrite technical and laying information refer to the installation manual for SICIS's make reference to the sales manager in charge or the Sicis technical department. View the tutorial videos available online regarding Vetrite technical and laying information available on the website [www.sicisvetrite.com](http://www.sicisvetrite.com). VETRITE is a decorative technical glass slab, which is obtained by pressing together polymers in liquid phase, metal foils and textile fibres. The result is a versatile, high-tech composite that can be used to meet the most ambitious aesthetic, technical and environment requirements. Standard thickness 6 mm; on request, it can be made for special applications in a thickness of 4 to 20 mm. For flooring, a thickness of 10 mm is recommended, with the SicisGrip finish of Satin finish.*

#### **VETRITE E AMBIENTE**

La versatilità della tecnologia VETRITE consente, su richiesta, di fornire il prodotto partendo da vetri speciali pretrattati quali autopulenti, antibatterici etc.. I vetri speciali a pulizia facilitata, sono caratterizzati da uno strato sottile e trasparente che conferisce proprietà fotocatalitiche e idrofile molto efficaci nel mantenere pulita la superficie. Lo strato fotocatalitico utilizza l'azione combinata dei raggi UV della luce solare e dell'acqua, per rimuovere lo sporco che si accumula sulla superficie del vetro. L'utilizzo di questi vetri speciali pretrattati, non è consigliato per applicazioni a pavimento.

#### **VETRITE AND ENVIRONMENT**

*The versatility of the VETRITE technology makes it possible to supply the product, on request, using special glass that is pre-treated to make it self-cleaning, anti-bacterial etc. The special easy-cleaning types of glass have a thin, transparent layer that gives the glass photocatalytic and hydrophilic properties that are very effective in keeping the surface clean. The photocatalytic layer exploits the combined action of the UV rays of sunlight with water to remove any dirt that accumulates on the surface of the glass. The use of these special pre-treated types of glass is not recommended for flooring.*

#### **VALUTAZIONE DELLA QUALITÀ**

Data la natura di VETRITE per la definizione dei requisiti di qualità è necessario riferirsi allo standard europea EN 1036-1:2007 Vetro per l'edilizia.

Metodi di ispezione e di giudizio estetico: VETRITE deve essere osservata in una posizione verticale, ad occhio nudo e in normali condizioni di luce diffusa (naturale o artificiale, tra 300 lx e 600 lx), da una distanza di 1 m. La direzione di osservazione deve essere perpendicolare alla lastra di vetro. L'uso di una fonte di illuminazione aggiuntiva, come ad esempio un riflettore, non è considerata attinente allo scopo e può essere fuorviante nel giudizio. Il cliente/trasformatore/ installatore deve effettuare un'ispezione visiva della lastra, preliminarmente alle operazioni di lavorazione e previa pulizia accurata della superficie in esame. Eventuali difformità emerse devono essere segnalate prima della lavorazione. Sicis non accetterà segnalazioni o contestazioni una volta che il prodotto è stato lavorato e/o installato.

#### **QUALITY ASSESSMENT**

*In light of VETRITE's technical features, for quality assessment purposes it is necessary to refer to the European standard EN 1036-1:2007 Glass in building.*

*Quality assessment methods. Inspection methods: VETRITE must be checked in the vertical position, with the naked eye and in normal conditions of diffused*

*light (natural or artificial, between 300 lx and 600 lx), standing at a distance of 1 m. The direction of observation must be perpendicular to the glass slab. It is not permitted to use a source of additional light, such as a reflector, since that such additional lighting could distort quality assessment. The client/installer is required to carry out a visual inspection of the slab and accurate cleaning of the slab's surface prior to working the slab. Any defects that may be noted must be reported prior to processing. SICIS will not accept any claim or dispute after the slab has been processed or installed.*

#### **REQUISITI DIMENSIONALI**

Per le dimensioni inferiori o uguali a 2000 mm, la tolleranza standard è +/- 1 mm della dimensione nominale. Per le dimensioni superiori a 2000 mm, la tolleranza standard è +/- 1,5 mm della dimensione nominale. La tolleranza da applicare è determinata dalla dimensione massima della lastra. La tolleranza dell'ortogonalità è espressa come la differenza di lunghezza tra le dimensioni diagonali della lastra. Per lastre con entrambe le dimensioni inferiori o uguali a 2000 mm, la differenza non deve essere superiore a 3 mm. Per lastre con uno (o entrambi) dimensioni superiori a 2000 mm, la differenza non deve superare i 4 mm.

#### **DIMENSIONAL REQUIREMENTS**

*For dimensions less than or equal to 2000 mm, standard tolerance is +/- 1 mm of the nominal value. For dimensions over than 2000 mm, standard tolerance is +/- 1,5 mm of the nominal value. The standard tolerance range to be applied shall be determined by the largest slab dimension. The squareness tolerance shall be expressed as the difference in length between the diagonal slab dimensions. For slabs with both dimensions less than or equal to 2000 mm the difference shall not exceed 3 mm. For slabs with one (or both) dimensions greater than 2000 mm the difference shall not exceed 4 mm.*

#### **POSA DI VETRITE - RIFERIRSI AL MANUALE DI POSA**

Disponibile su [www.sicis.com](http://www.sicis.com)

L'installazione e la pulizia di Vetrite devono essere idonei all'ambiente di destinazione.

Vetrite può essere danneggiato, questo dipenderà in larga misura dall'ambiente in cui viene utilizzato. Devono sempre essere considerate le seguenti raccomandazioni:

- I materiali di fissaggio utilizzati non devono essere di natura aggressiva.
- Quando Vetrite viene inserito in profili, i bordi possono essere danneggiati da condensazione, agenti chimici (detergenti, ecc) che possono rimanere all'interno del profilo.
- La superficie e la massa del materiale del substrato a cui Vetrite è fissato deve essere pulito, asciutto, privo di umidità, acidi, alcali e altri materiali aggressivi.
- Le istruzioni del produttore di adesivi, devono essere sempre seguite.
- Tutti gli adesivi e prodotti utilizzati devono essere compatibili con Vetrite.
- La selezione e l'applicazione di adesivi/prodotti chimici, insieme con la scelta del substrato e preparazione per il fissaggio Vetrite, è esclusivamente a discrezione e responsabilità dell'installatore.
- La selezione del detergente per la pulizia di Vetrite, in base alla destinazione d'uso, è esclusivamente a discrezione e responsabilità dell'installatore.
- Sicis è disponibile ad assistere e suggerire gli installatori.

#### **INSTALLATION OF VETRITE – REFER TO THE INSTALLATION MANUAL GENERAL RECOMMENDATIONS**

Available on [www.sicis.com](http://www.sicis.com)

*General recommendations:*

- *Vetrite should be used in suitable environments and should be cleaned and maintained per suggestions.*
- *Vetrite material should be handled with care.*
- *The Vetrite should be clean, dry, free of humidity, acid, alkali and any other aggressive chemicals like cleaning agents when installing and also when using profiles.*
- *Recommended manufacturer's adhesives should be strictly observed.*
- *All adhesives and chemicals used should be compatible with Vetrite.*
- *The selection and application of adhesives and chemicals, along with the choice of the substrate and preparation for installing Vetrite, is solely at the discretion and risk of the installer.*
- *Sicis is available for any assistance and suggestions.*

#### **PULIZIA E MANUTENZIONE**

Un'accurata e regolare operazione di pulizia non solo preserva le qualità estetiche delle superfici ma ne mantiene anche inalterate le caratteristiche. Le operazioni di pulizia devono essere eseguite manualmente o con idonea attrezzatura dall'alto verso il basso. Si raccomanda in ogni caso di fare preventivamente un test di pulizia su una porzione limitata della superficie da trattare, per verificare la compatibilità del detergente. Non spruzzare il detergente direttamente sulla superficie del materiale, ma sul panno morbido e pulito. Non utilizzare detergenti abrasivi e aggressivi. Evitare detergenti o composti chimici contenenti Acido Fluoridrico, Acido Solforico. Particolare cura ed attenzione va posta qualora VETRITE non fosse sigillata/stuccata sui bordi. In questo caso evitare prodotti acidi o alcalini ma solo detergenti neutri. Prendere visione delle sostanze che possono essere causa di alterazioni estetiche anche a distanza di tempo indicate nel Manuale di lavorazione, installazione e posa di Vetrite scaricabile dal nostro sito.

#### **CLEANING AND MAINTENANCE**

The accurate, regular cleaning of the surface will not only preserve their beauty but will maintain the characteristics. The slabs must be cleaned manually or using suitable equipment, working from the top downwards. We always recommend cleaning a small area of the surface first, to check that the detergent is suitable. Do not spray detergent directly onto the surface of the material, but onto a soft, clean cloth. Do not use any abrasive, aggressive detergents. Avoid detergents or chemical compounds containing hydrofluoric acid or sulfuric acid. Apply extra caution when cleaning VETRITE that has not been grouted yet or in which gaps between edges have not been sealed yet. Make sure to only use neutral detergents. Make also sure that none of the substances listed as non-compatible with VETRITE by the dedicated paragraph of Vetrite technical and laying information downloadable on our website.

\* SicisGrip è un trattamento in fase produttiva volta a creare una superficie antiscivolo conforme con lo standard ANSI A137.1 per DCof

\* *SicisGrip is a treatment during production that creates a slip resistance surface and complies with the ANSI A137.1 standard for DCof*
