^{IT} Isy22 è un sistema per il governo dell'acqua versatile, composto da 4 famiglie di prodotti: il monocomando, il progressivo, la classica versione tre fori con leve o con manopole.

Il design essenziale e iconico di ogni collezione è caratterizzato da finiture particolari.

Oltre alle finiture più consuete - cromo, brushed nickel, metal black, brushed metal black, brushed British gold PVD, brushed copper PVD e nero opaco - un inedito, intenso e vibrante blu Mediterraneo valorizza il monocomando e la serie tradizionale con leve.

Il miscelatore progressivo è caratterizzato anche da alcune audaci proposte bicolore dalle tinte giocose e accese, abbinando il verde cobalto al brushed metal black, il giallo ocra al brushed British gold PVD e il rosso Siena al brushed copper PVD.

Nella versione tradizionale le manopole circolari sono in marmo in diverse pregiate nuances, per diversificare un prodotto rivolto ad un mondo più sofisticato. Il marmo Calacatta Oro si combina con il brushed copper PVD, il marmo Verde Aver con il metal black, il marmo Noir Doré con il nero Opaco.

Tutti i rivestimenti superficiali sono accuratamente realizzati per garantire la perfetta qualità del prodotto e un'ottima durata nel tempo. Per mantenere al meglio le superfici si raccomanda di pulire con acqua e sapone, utilizzando un panno morbido.

Non impiegare detersivi che contengono acido cloridrico o sostanze abrasive.

^{EN} Isy22 is a versatile water control system consisting of four product families: the single-lever mixer, the progressive mixer, and the classic two-handle version with levers or with knobs.

The essential, iconic design of each collection is characterised by special finishes.

In addition to the most common finishes - chrome, brushed nickel, metal black, brushed metal black, PVD brushed British gold, PVD brushed copper and matt black - an unusual, intense and vibrant Mediterranean blue enhances the single-lever mixer and the two handle series with levers.

The progressive mixer features also a few bold bicoloured designs in playful, bright tones, matching cobalt green with brushed metal black, ocra yellow with PVD brushed British gold and Siena red with PVD brushed copper.

The circular knobs of the 2 handle version are made of natural marble in different exquisite shades in order to diversify a product aimed at a more sophisticated world. Calacatta gold marble is combined with PVD brushed copper finish, green Aver marble with metal black, the noir doré marble with matt black finish.

All surface coatings are carefully made to guarantee the perfect quality of the product and the best duration over time. For best care of surfaces, use a soft cloth, soap and water to clean.

Do not use detergents containing hydrochloric acid or abrasive substances.
