MADE IN ITALY

RIALTO KITCHEN

SICIS presenta la prima cucina nata all'interno della collezione Home.

L'arte del mosaico e l'arte della cucina, apparentemente distinte e lontane, condividono un legame intrinseco che risiede nella loro essenza creativa e nell'attenzione al dettaglio. Entrambe queste forme di espressione artistica nascono da una combinazione armoniosa di elementi per creare un'opera che colpisca i sensi e l'anima. Il mosaico attraverso le sue tessere variopinte e minuziosamente posizionate, è simbolo di pazienza e di precisione. Ogni piccolo frammento è parte di un disegno più grande, una composizione che si svela solo quando tutte le parti sono unite. Allo stesso modo, l'arte culinaria combina ingredienti differenti, ciascuno con la propria consistenza, colore e sapore, per creare un piatto finale che è più della somma delle sue parti.

Il legame tra mosaico e cucina si manifesta anche nella loro capacità di raccontare storie e culture. Ogni mosaico narra vicende attraverso le sue immagini e motivi, così come ogni piatto racconta la storia di una tradizione culinaria, riflettendo l'identità e l'anima di un luogo.

Così, nell'esplorare il legame tra l'arte del mosaico e l'arte della cucina, scopriamo un mondo dove la bellezza visiva e quella gustativa si intrecciano, creando un'esperienza sensoriale unica che celebra la creatività umana in tutte le sue forme.

La conoscenza approfondita dei materiali così applicata delle tecniche di lavorazione e del design acquisita nella produzione di mosaici, si rivela pratica illuminante e feconda nella creazione dello spazio cucina, nella selezione e combinazione di materiali diversi e innovativi, dove qualità ed estetica si fondono per soluzioni attraenti e funzionali.

SICIS presents the first kitchen born within the Home collection. The art of mosaic and the art of cooking, seemingly distinct and distant, share an intrinsic bond rooted in their creative essence and attention to detail. Both of these forms of artistic expression arise from a harmonious combination of elements to create a work that impacts the senses and the soul. Mosaic, through its meticulously placed colorful tiles, symbolizes patience and precision. Each small fragment is part of a larger design, a composition that is revealed only when all parts are united. Similarly, the culinary art combines different ingredients, each with its own texture, color, and flavor, to create a final dish that is more than the sum of its parts. The connection between mosaic and cuisine also manifests in their ability to tell stories and cultures. Each mosaic narrates tales through its images and motifs, just as each dish tells the story of a culinary tradition, reflecting the identity and soul of a place. Thus, in exploring the link between the art of mosaic and the art of cooking, we discover a world where visual and taste beauty intertwine, creating a unique sensory experience that celebrates human creativity in all its forms. The in-depth knowledge of materials, applied techniques, and design acquired in the production of mosaics proves to be illuminating and fruitful in creating the kitchen space. This involves the selection and combination of different and innovative materials, where quality and aesthetics merge for attractive and functional solutions.

CONCEPT

RIALTO, un progetto che si esprime attraverso un segno geometrico addolcito da rotondità funzionali e grande attenzione alle proporzioni dove l'eccellenza della qualità italiana sposa l'innovazione e la scelta di materiali inediti e originali.

Un programma che prevede grande componibilità con composizioni e soluzioni su misura, pensato per rispondere alle più esigenti richieste dei clienti internazionali.

L'originalità degli inserti in Vetríte, del metallo in finitura champagne satinato e della cannettatura in legno lavorato artigianalmente mostrano una nuova idea di lusso internazionale. Le molteplici possibilità di finiture, soprattutto per quello che riguarda la Vetríte permettono di presentarla sempre in nuova veste.

Protagonista assoluto è l'isola centrale che si contraddistingue per le sue forme morbide e sinuose. Le numerose alternative di componibilità contribuiscono alla modularità progettuale della cucina Sicis. Ad arricchire l'isola centrale è la possibilità di inserire un tavolo a sbalzo, disponibile in forma rotonda o ellissoidale, che ruota su un perno centrale per dare maggiore spazio alla convivialità.

Il programma RIALTO prevede un ampio sistema di colonne, basi e pensili personalizzabili pensate per la preparazione e per il contenimento. Le ante delle colonne, con un morbido movimento scorrono lateralmente, svelando un ampio spazio funzionale al loro interno. Gli schienali in vetrite retroilluminata rendono tutte composizioni ricche di personalità e originalità, caratteristiche che da sempre contraddistinguono i prodotti SICIS.

RIALTO a project that is expressed through a geometric signs of tened by functional roundness and great at tention to proportions where the excel lence of Italian quality marries innovation and the choice of new and original materials

A program that offers great modularity with customizable compositions and solutions, designed to meet the most demanding requests of international clients. The originality of the inserts in Vetríte, the metal in satin champagne finish, and the handcrafted wood cannature show a new idea of international luxury. The multiple finishing possibilities, especially regarding Vetríte, allow it to be presented in a new guise every time. The absolute protagonist is the central island, which stands out for its soft and sinuous shapes. The numerous options for customization contribute to the modular design of the Sicis kitchen. To enrich the central island, there is the possibility of adding a cantilever table, available in round or ellipsoidal shape, which rotates on a central pivot to provide more space for conviviality. The RIALTO program features a wide system of customizable columns, bases, and wall units designed for preparation and containment. The column doors, with a smooth lateral movement, slide to the side, revealing a spacious functional space inside. The back panels in backlit glass make all compositions rich in personality and originality, characteristics that have always distinguished SICIS products.

CAPITOLO 1

Colonne con anta a scomparsa cannettata wave con cornice metallica | essenza olmo moka opaco | metallo champagne lucido | vetrite onigem giada | modulo doppio con interno modulo forno | 2 modulo triplo con interno ante battente e mensole

Isola centrale RI.PC.02 SX con lavello rotondo diametro 55 cm + RI.PCM.04 DX con piano cottura a induzione |

Vetrinetta sospesa grande con ante rete metallica e cornice metallica

CHAPTER 1
